KEY CHALLENGES FOR SUSTAINING GROWTH AND COMPETITIVENESS IN SEE

GLOBAL TRENDS

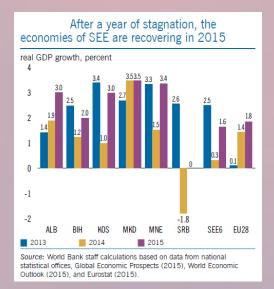

- Accelerating growth in advanced economies (US, UK, Eurozone) vs. Slowdown in almost all emerging markets
- Downward revisions of oil prices have an impact on global inflation and thus on monetary policies
- Increasing uncertainties on Chinese growth and US monetary policy have lead to higher volatility

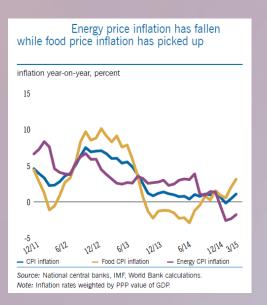

EUROPE: A REGION SPARED BY THE CURRENT TURMOIL?

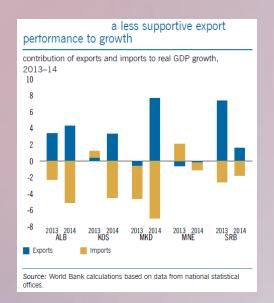

- Sustained growth in Central and Eastern Europe
- "Two-speed" differences in the banking sector between north and south are asset quality and loan growth
- Rising political uncertainties in several countries

MACROECONOMIC DATA SEE

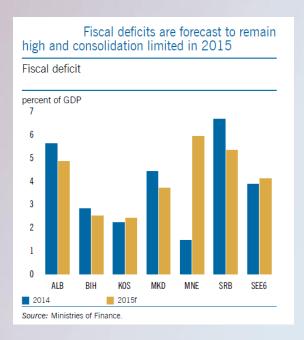

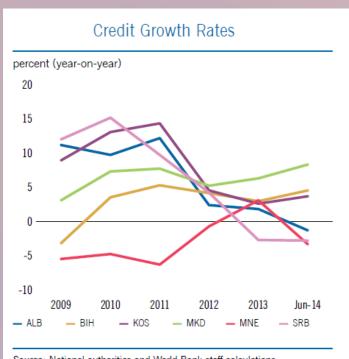

BANKING SECTOR IN SEE

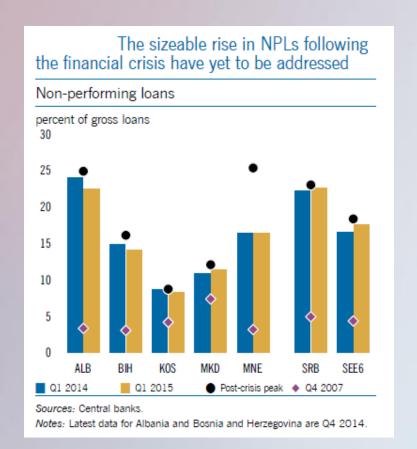

Domestic credit is still contracting in Southeastern Europe, albeit at a slower pace

Source: National authorities and World Bank staff calculations.

Note: Average growth rate for the period 2003–2005 for Albania and Serbia, and for the period 2004–2005 for FYR Macedonia and Montenegro. Due to the accounting harmonization with IFRS, data for Montenegro for 2010 onwards is not comparable.

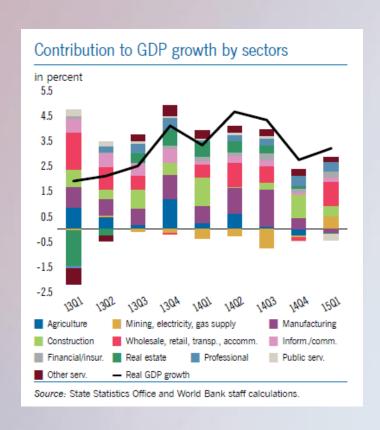

Still high NPLs ratio and uncertainty about collateral values

REPUBLIC OF MACEDONIA KEY DATA

- Economic growth in R. Macedonia continued to be strong in the first quarter of 2015.
- •The economic expansion has been led by commerce and services, particularly retail trade and financial services. Industrial production and construction slowed down in early 2015.
- On the demand side, private consumption growth has been strong since the beginning of 2015, while investment growth moderated compared to 2014.
- •The trade deficit continued to narrow as exports perform well, driven by foreign direct investments companies.
- •Fiscal performance in the first four months of 2015 improved compared to 2014, but the composition of spending remains unfavorable.

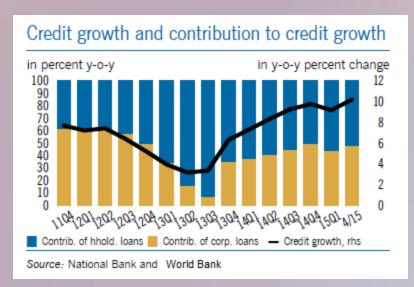

REPUBLIC OF MACEDONIA OUTLOOK

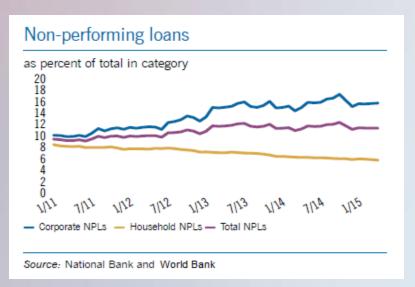

- Public investment and FDI-related exports will remain the main drivers of growth in 2015.
- GDP growth is projected to reach 3.5 percent in 2015 and accelerate to 3.8 percent in 2016.
- •A number of public investment projects, which include the construction of two new highways, have started or are expected to start in 2015.
- In addition, private consumption is expected to gain strength, increasing its contribution to growth.
- Most of the government's financing needs for 2015 and early 2016 have been met.
- The announced inflows of FDI pipeline remains sizable as new investments were announced in 2015 and some existing companies started expanding their facilities. Nevertheless, the current political crisis poses a downside risk to the economy, if not resolved soon.

REPUBLIC OF MACEDONIA BANKING SECTOR

- Financial sector stability has been preserved during the global financial crisis.
- The market is dominated by foreign banks, which account for over 90 per cent of total banking assets.
- Banks have relied primarily on domestic deposits to fund lending and less on parent bank capital (the loan-to-deposit ratio of the private sector is about 93 per cent), so they were not as affected by deleveraging pressures during the crisis as their regional peers.
- The non-performing loan ratio has been kept between 11% and 12% in last two years.

KEY CHALLENGES FOR SUSTAINING GROWTH AND COMPETITIVENESS IN SEE

- Education of workforce
- Infrastructure
- Financial Markets development
- Technological readiness
- Business Sophistication
- Innovation
