Macedonia2025's contribution to the "The National Strategy for Education 2026–2032"

[Comment on the Strategy](#)

Macedonia2025 was actively engaged in the preparation of the National Strategy for Education 2026–2032. We took part in shaping the strategic direction of this Strategy given its importance for the future development of the human capital in Macedonia and contributed to the finalization of the action plan with recommendations rooted in international best practices and local needs. Our contribution was primarily focused on the segment of the higher education, innovation and science which resonates best with the mission and programs of Macedonia2025. We also took part in the Government's validation workshop for the draft Education Strategy 2026–2032. We highly encourage you to contribute to the finalization of the Strategy in this period of public consultations. You can do that by providing your comments [here](#).
